# GREY BLANKET

STONE

## GREY BLANKET

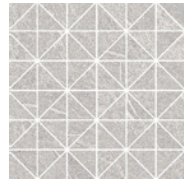

A singularly dynamic and unique collection whose texture is reminiscent of creased paper. This effect is the result of combining a uniformly grey surface with scratches and an irregular, three-dimensional texture. The surface finish intensifies the effect – the microgranilia-type glaze used is sure to satisfy those who look for uniqueness, delicacy and softness in their tiles. This collection is also great for well-lit spaces – the tiles refract light beautifully, making for a visually-stunning effect.
