Balcony & terrace tiles are a way to create a beautiful, durable and safe environment for a house or apartment. Thanks to their high technical and performance parameters, 2.0 gres tiles are extremely durable and will perform well in all weather conditions. They will pass the test perfectly on the terrace or balcony – they can also be laid as paths in the garden, around the house, as the base for a gazebo and patio, or as steps outside the building.

Mounting on balconies on brackets is quick and easy, plus it allows water drainage and routing of cables or pipes under the panels. This is a solution that will stay relevant for years – resistant to extreme weather conditions.

WHY CHOOSE THE 2.0 BALCONY & TERRACE TILES FROM OPOCZNO?

TOSCANA RUSTIC 2.0

A sunny and warm collection reminiscent of the idyllic beauty of Tuscany or southern Greek villas surrounded by lush vegetation. In doing so, it shows the varied facets of aged concrete texture, with its picturesque transitions and shades. The areas around the edges of the tiles have a more pronounced darker "frame." When laid, the tiles form a mosaic with a subtle, heterogeneous concrete structure. The collection is available in three soft shades: Cream, Grey and Taupe.

TOSCANA RUSTIC looks great on both the terrace and balcony. It allows you to arrange an atmosphere conducive to spending time outdoors. It is durable and easy to clean, resistant to turbulent weather and non-slip.

STONE

BOLT 2.0

A bold and distinctive collection for lovers of the beauty of natural stone. It subtly and fancifully alludes to its texture, meticulously reproducing this unique organic structure. The gres is in soft and soothing shades of gray, beige and brown. Versatile enough to provide a wide range of design possibilities. The tiles within the collection are tonal. Their pattern varies from one to another just like real stone, creating a natural, interesting and varied surface.

The BOLT collection looks great on the balcony and terrace, and is particularly expressive when surrounded by greenery, with which it creates a natural and friendly landscape – perfect for a moment of relaxation after work. Non-slip, durable and adapted to changing weather conditions, it effectively resists the passage of time.

MEDICIO 2.0

The vivid and varied texture of this collection refers to Bluestone. The eye catches every little pebble here. The reproduction of the natural material is extremely precise and impressive. Three shades are available in the MEDICIO collection: lighter and darker grays, and graphite. Their aesthetics are reminiscent of Scandinavia, where nature meets restrained, yet bold aesthetics.

Gres is very expressive and is perfect for balconies, terraces or garage areas. It looks so natural surrounded by greenery that together they create a soothing landscape conducive to relaxation.

MARENGO 2.0

A collection created for lovers of minimalism and the beauty of nature. The texture of the gres alludes to the structure of slate stone characterized by a smooth and gentle grain. The matte finish gives the gres a refined elegance, and it is enlivened by radiant reflections. The friendly, warm aesthetic of the gres invites you to take off your shoes and touch it with your bare feet.

MARENGO is a collection that is an ideal base for a minimally arranged terrace or balcony. Thanks to its non-slip properties and matte finish, it is perfect for the garden in areas around the pool, as well as the paths leading to it.

WOOD

WOOD MOMENTS 2.0

A collection for lovers of picturesque and unique wood designs. WOOD MOMENTS consists of four colors: shades from light to dark, the pattern of which is inspired by the characteristics of oak wood grain, with its distinctive knots and grain. This is the much-loved classic at its finest. Wherever WOOD MOMENTS gres goes, it enlivens and warms the space. It brings natural harmony, so conducive to relaxation.

WOOD MOMENTS will work just about anywhere. It opens a wide range of arrangement possibilities on terraces, but it looks just as good on a balcony, with geraniums or begonias flowering in pots. Durability, resistance to changing weather conditions and anti-slip properties at the same time make this gres extremely user-friendly.
