

PATCHWORK CONCEPT 29,8 × 29,8

NEW PATTERN IN THE CONCEPT

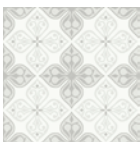

# PATCHWORK CONCEPT 29,8 × 29,8

The patchwork pattern originates from Victorian England. It is a special sewing method, in which small, geometric pieces of fabric are sewn together, forming a unique composition. Patchwork tiles have been created with inspiration with this technique, becoming – similarly to fabric – a carrier of original and clever designs.

**PATCHWORK CONCEPT** by Opoczno consists of tile collections using geometric, floral or vintage-inspired patterns. They are available in versatile colours – white, black and grey. With these tiles, you can create custom compositions in the interiors of houses and apartments, both on the walls and floors. Patchworks enable a wide range of arrangement possibilities – the imagination of the creator is the only limit.

### PATCHWORK FLORES

These satin glazed porcelain tiles feature a geometric pattern of flowers that are ideal for the walls and floors of bathrooms, kitchens, hallways and anterooms. When applied to large areas, Patchwork Flores gives a unique ceramic “wallpaper” effect. The warm tones of the decorative elements help create the vintage look favoured by many, yet when coupled with accessories in bolder colours, it shifts the ambiance to a more modern style.

PATCHWORK FLORES 29,8 x 29,8 & GRAND WOOD RUSTIC MOCCA 19,8 x 179,8 & GRAND CONCRETE GRAVA WHITE 59,8 x 59,8

-  frostproof tile
-  abrasion class

PATCHWORK FLORES 29,8 × 29,8 & GRAND WOOD RUSTIC MOCCA 19,8 × 179,8

### PATCHWORK VERTIGO

The main theme of the collection is a geometric pattern in the classic combination of black and white. It fits perfectly in, among others, interiors made in one of the most popular styles – Scandinavian.
